eMyLabCollect facilitates specimen collection anywhere the patient may be. Using eMyLabCollect, the healthcare provider has a real-time list of collections, the ability to quickly print labels, and an efficient method to update the applicable LIS system of completion.

**SIMPLIFY**
specimen collection

**MAXIMIZE**
productivity

**MINIMIZE**
data entry

eMyLabCollect (eMLC) is the FUTURE of specimen collection, tracking, and processing. It is a MOBILE SOLUTION that allows collections to occur ANYWHERE – on the HOSPITAL floor, a LABORATORY collection site, or even a HOME visit by a healthcare provider. eMLC provides easily understood scheduling, POSITIVE patient identification, and a lab INSTRUMENT-READY label. Human error is GREATLY REDUCED and large time savings are realized as lab technicians receive and prepare the specimen for testing.
